

**Crowbox 3rd generation
template for pole mount**

v1.0 July 30, 2025

Print at "100% scale" or "actual size". Do NOT use "fit to page" or "fill entire page" options! After printing, verify that the square below measures 60mm on each side before using it as a mounting template! If the printed square isn't 60x60mm, recheck printer settings and try again. If you prefer imperial measurements, use the blue square further below to verify template scale.

For imperial measurements, verify that this blue square measures one inch on each side to ensure this template was printed at the correct scale.
